

Creating and improving user experiences through visual and interaction design.

CROSSLAKE

UI/UX

Previously, this product didn't have a visual style for setting pages but I created one that was familiar with users and created rules to be consistent across different settings.

RENDALL & RITTNER

UI/UX

The client had a task progress page that was overwhelming but I stripped it back and used icons to communicate instead. I also gave the interface a revamp to match other sections.

ballymore.

UI/UX Branding

Ballymore needed a system that matched up rental payments with tenants so they knew who had paid and who hadn't. Had no brand rules to use so I used greyscale to match their website

'SUP

UI/UX Branding

So many hospitality venues have different systems but more often than not, it includes accident-prone paperwork for rotas, cleaning, signing. This app aims to solve all these problems!

CROSSLAKE

UI/UX

Users were overwhelmed and had to download information they didn't need, but the solution was an export section so they got to choose what they downloaded and preview it first. (see case study for more info)
